

BANARAS HINDU UNIVERSITY

Faculty of Science

Semester I Examination 2024-25 (NEP)

Value Added Course (VAC): Environmental Science**Mid Term Test — Paper Code: BHUVA12**

Time: One Hour

Maximum Marks: 30

Instructions: The question-booklet contains 30 objective type questions. Candidates must attempt all questions. Each question has four options. Darken any one correct answer. If more than one circle is darked answer will not be evaluated and zero marks will be awarded. Use of log tables or calculators is not permitted.

Question 1. Which component of an ecosystem includes all the physical conditions that influence the life of organism within it? [1]

- (a) Abiotic component
- (b) Biotic component
- (c) Chemical component
- (d) Genetic component

Question 2. Who proposed the term 'Ecosystem'? [1]

- (a) A.G. Tansley (1935)
- (b) H. Reiter (1868)
- (c) Ernst Haeckel (1886)
- (d) Grinnel (1971)

Question 3. In a food chain, herbivores are – [1]

- (a) Primary producer
- (b) Secondary consumer
- (c) Primary consumer
- (d) Tertiary consumer

Question 4. River is an example of – [1]

- (a) Lentic ecosystem
- (b) Lotic ecosystem
- (c) Marine ecosystem
- (d) Terrestrial ecosystem

Question 5. Phytoplanktons are the component of the which following ecosystem – [1]

- (a) Forest
- (b) Grassland
- (c) Desert
- (d) Pond

Question 6. Which of the following is not an ecosystem service? [1]

- (a) Soil quality maintenance
- (b) Decomposition of waste
- (c) Weathering of rock
- (d) Climate regulation

Question 7. Which of the following is not a producer? [1]

- (a) Plant
- (b) Herbivore
- (c) Chemosynthetic microorganism
- (d) Grass

Question 8. Which of the following statement is not true? [1]

- (a) Flow of energy in ecosystem is always unidirectional
- (b) Detritus food chain starts with dead organic matter
- (c) Chemosynthetic microorganisms are producer
- (d) Secondary productivity is related to decomposer

Question 9. Which one of the following is considered as the major cause of biodiversity loss? [1]

- (a) Climate Change
- (b) Global Warming
- (c) Habitat Loss
- (d) Invasive species

Question 10. Which one of the following is not an example of *in-situ* conservation strategies? [1]

- (a) National Park
- (b) Botanical Garden
- (c) Wildlife Sanctuary

(d) Biosphere Reserve

Question 11. Which one of the following is an example of national park? [1]

- (a) Kaziranga
- (b) Palamau
- (c) Pakke
- (d) Sessa

Question 12. Highest biodiversity used to be found in – [1]

- (a) Tropical semi-evergreen forests
- (b) Tropical rain forests
- (c) Tropical deciduous forests
- (d) Tropical Grassland

Question 13. Which of the following is not a level of biodiversity? [1]

- (a) Genetic
- (b) Ecosystem
- (c) Gamma
- (d) Species

Question 14. Which of the following statement is true? [1]

- (a) *In-Situ* conservation is about conservation of biodiversity in their natural habitats
- (b) Human overpopulation is the prime cause of biodiversity loss
- (c) Overexploitation is about the exploitation of biodiversity for fulfilling needs
- (d) Botanical garden is an example of in-situ conservation strategy

Question 15. Which of the following is not true for invasive species? [1]

- (a) Invasive species are non-native in origin
- (b) Invasive species out-compete our native species
- (c) Invasive species are the second-largest cause of biodiversity loss
- (d) Invasive species are ecologically important

Question 16. In the earth's crust, which component stores the most freshwater? [1]

- (a) Lakes/River/Pond
- (b) Groundwater
- (c) Oceans

- (d) Glaciers

Question 17. What is the incidence of landmass movement and rockfalls? [1]

- (a) Landslide
- (b) Earth progression
- (c) Scaling off
- (d) Weathering

Question 18. San Andreas Fault is an example of – [1]

- (a) Convergent Plate Boundary
- (b) Transform Plate Boundary
- (c) Divergent Plate Boundary
- (d) American Plate Boundary

Question 19. In natural conditions, which process is responsible for the breakdown of rocks *in situ*? [1]

- (a) Erosion
- (b) Weathering
- (c) Mass wasting
- (d) Degradation

Question 20. What is the name of the type of rock that forms under high pressure and temperature conditions? [1]

- (a) Igneous
- (b) Sedimentary
- (c) Metamorphic
- (d) Basalt and Granite

Question 21. Which layer of the atmosphere is closest to Earth's surface? [1]

- (a) Stratosphere
- (b) Mesosphere
- (c) Exosphere
- (d) Thermosphere

Question 22. There is a layer of the Earth's surface that is referred to as the _____, which is a part of the lithosphere? [1]

- (a) Inner Core

- (b) Upper Mantle and Crust
- (c) Troposphere
- (d) Hydrosphere

Question 23. Which gas of the following is the most abundant in the Earth's atmosphere?
[1]

- (a) Helium
- (b) Hydrogen
- (c) Nitrogen
- (d) Argon

Question 24. During the summer months, the ozone layer acts as a shield against the _____ rays which are directed at our planet. [1]

- (a) Infrared rays
- (b) Gamma rays
- (c) Ultraviolet rays
- (d) More than one of the above

Question 25. The uppermost layer of the Earth's atmosphere is _____. [1]

- (a) Thermosphere
- (b) Mesosphere
- (c) Stratosphere
- (d) Exosphere

Question 26. Hydrosphere includes _____. [1]

- (a) Water on the surface of the plant
- (b) Underground water
- (c) Water in the air
- (d) All of the above

Question 27. The intensity of earthquakes is measured on _____. [1]

- (a) Beaufort scale
- (b) Richter scale
- (c) Secant scale
- (d) Mercalli scale

Question 28. Sandstone is a _____ rock. [1]

- (a) Igneous Rock
- (b) Metamorphic Rock
- (c) Sedimentary Rock
- (d) All of the above

Question 29. Which metal is most abundant in the earth's crust?

[1]

- (a) Aluminium
- (b) Magnesium
- (c) Calcium
- (d) Iron

Question 30. Molten material below the surface of the earth's crust is called _____.

[1]

- (a) Basalt
- (b) Magma
- (c) Lava
- (d) Limestone
